Microliter pipettes PIPETMAN®L Single-Channel , GILSON®

Ref.: GILSON.PIPETMAN.L | Categoría: Micropipetas, Pipetas automáticas

Descripción

Designed for performance and comfort, PIPETMAN® L comes in a comprehensive range of models adapted to your needs in the lab. Comfortable, precise, accurate, and reliable, use PIPETMAN L pipettes confidently in your applications.

Convenient Use

Lightweight and balanced, PIPETMAN L combines an ergonomic design with minimized pipetting forces, giving you the ability to pipette longer without fatigue. Right-handed or left-handed? No problem. Adjust the location of the tip ejector to the most comfortable position for you.

Secure Pipetting

Reduce pipetting errors and avoid accidental volume changes during pipetting cycles with a true volume-locking mechanism for improved accuracy and precision.
PIPETMAN L variable volume models are all fully autoclavable without disassembly for maximum convenience and protection from cross-contamination. Large volume models are equipped with a plastic tip ejector to avoid direct contact with the tip and better compatibility with chemicals.

Choose Your Tip Ejector

For single channel models, choose between a model with a stainless-steel tip ejector or a plastic ejector, depending on your needs and applications.

GLP Compliance

PIPETMAN L models feature a DataMatrix 2D code for easy traceability. Use a 2D code scanner to transfer the code automatically into any traceability or asset management system. Also, the pipette serial number is engraved on the body of the pipette for unique identification.
