Matraz aforado clase A, con tapón PE, ámbar, graduación en blanco, DURAN®

Ref.: DURAN.4652 | Categoría: Matraces aforados

Descripción

With etched graduation mark and ergonomic polyethylene stopper

- Complies with ISO 1042
- Made from borosilicate glass 3.3
- UV protection due to external colouration; very durable and chemically resistant amber colour. The only external application of the colour ensures that internal surfaces have standard DURAN® glass properties.
- Outstanding precision during volumetric measurement and high-quality process stability
- Thanks to the exact processing and precisely calibrated scales, they permit the highly accurate determination and measurements of volume
- Supplied with ergonomic polyethylene stopper for easy and safe tightening or removal
- Calibration based on the poured in volume (“In”) at a + 20 °C reference temperature
- The volume content tolerances conform to accuracy Class A
- With etched graduation mark
- Fired-on, highly durable white print
