Base con ruedas para recipientes LN2, Auguste Cryogenics®

Ref.: AC.HAAD1100 | Categoría: Tanques Nitrógeno Líquido (LN2)

Descripción

The roler base for the AC Medical Family series is specifically designed to facilitate the transport of aluminum sample storage containers or liquid nitrogen storage and transport containers. The stable and tip-proof construction made of stainless steel ensures safe handling. With five smooth-running castors, two of which have brakes, moving the cryogenic container is easy and there is no need for heavy lifting.

Especificaciones técnicas

Referencia	Ref. fabricante	Producto	Env
H-AAD1100016	H-AAD1100016	Base rodante, S, 4 rodillos, para recipientes de nitrógeno Auguste Cryogenics de 30, 35, 50, 60 L Usable diameter: 465 mm	1
H-AAA1100464	H-AAA1100464	Base rodante, M, 4 rodillos, para recipientes de nitrógeno Auguste Cryogenics de 47 y 100 L Usable diameter: 525 mm	1
H-AAA1100125	H-AAA1100125	Base rodante, L, 5 rodillos, para recipientes de nitrógeno Auguste Cryogenics de 65, 95, 115, 145 Y 175 L Usable diameter: 687 mm	1
