

Pasteur-Plast Pipettes

Pasteur-plast pipettes

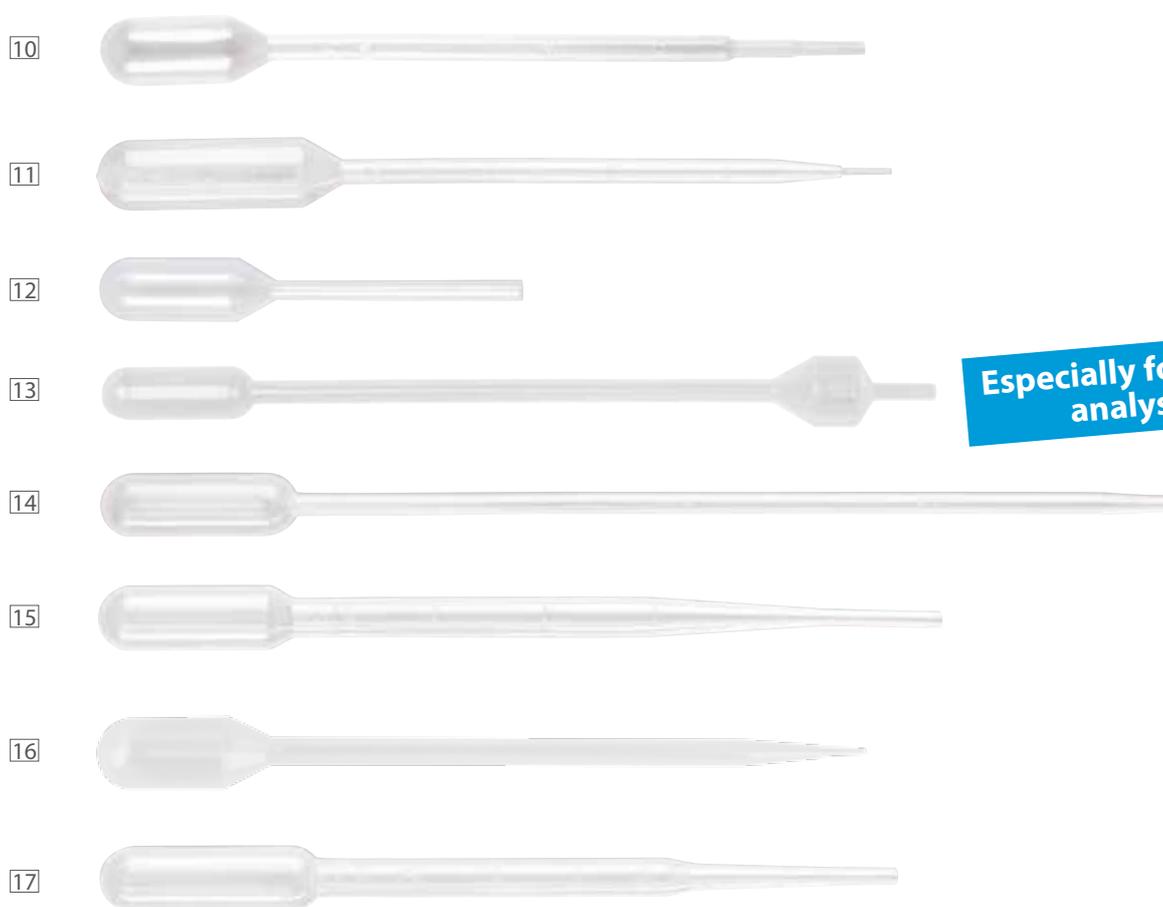

Pasteur-plast pipettes render liquid handling simple and safe. Cross-contamination and carry-over simply cannot occur making so tedious clean-ups unnecessary. In addition, there is no risk of glass breakage with the resulting danger of infectious material escaping. The Pasteur-plast pipettes are made of transparent polyethylene. They are inert to biological fluids and most acids. The low affinity of the surface reduces the loss of cells and valuable proteins through binding.

- soft, elastic bulb
- unbreakable – thus reducing the risk of glass injury
- burr-free orifice for neat, clean and precise dispensing
- only externally graduated Pasteur-plast pipettes with clearly visible embossed graduations
- sterile Pasteur-plast pipettes are gas-sterilized and individually packaged
- BSE-free
- can be used for food
- made of LD-PE
- usable up to medium temperature 70°C
